

# SEALED AIR® Brand FasFil® M

The SEALED AIR® brand FasFi® M is a manual paper void-fill dispenser that installs in seconds and requires no power to operate. It can be used with the FasFil® Mini by removing the perforated box sections and placing the box of fan fold paper on the FasFil® M dispenser to start packing.

It's ergonomically designed with packers in mind. The easy cut-and-tear process allows for single-handed operation. The unit holds the paper packaging material above the work surface to optimize the entire pack station space. The included height-adjustable stand can be extended so the dispenser can fill tall boxes or be lowered so the entire unit can fit under shelves if needed. It can also be mounted directly onto a shelf or a work bench with screws or with a clamp.

## ORDERING INFORMATION

Item #	Description
